

CounterPro

easy number animation

USER GUIDE

Installation

No installation is required. However, you can add the preset in a specific folder to easily find it in “Effects and Presets” panel. Just drag and drop the preset (.ffx) into this folder :

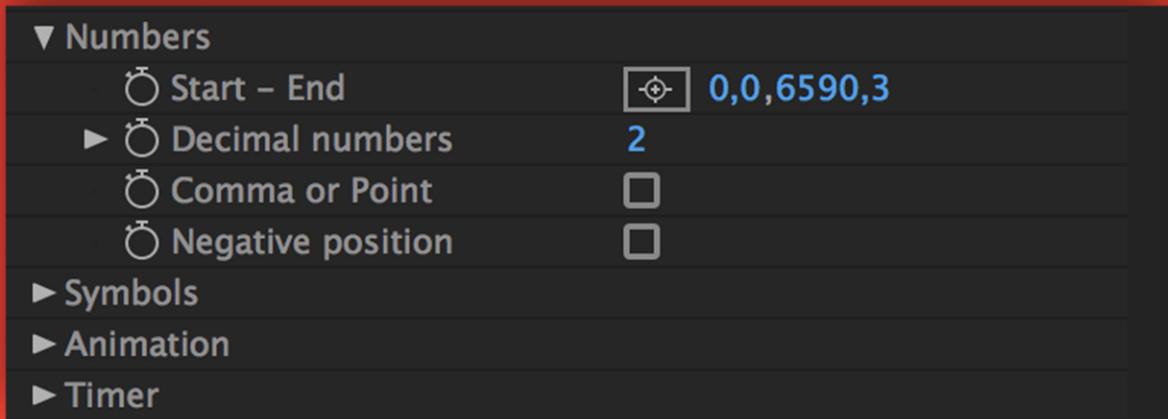

WINDOWS : Program Files\Adobe\Adobe After Effects XX\Support Files\Presets
MAC OS : Applications/Adobe After Effects XX/Presets

How it works

You can animate CounterPro without any keyframes. It only works when applied on a text layer. If you followed the steps above, you will find the preset in the “Effects and Presets” panel. If not, here is the procedure :

1. Create a text layer, empty or not, it doesn't matter.
2. Select the text layer.
3. Go to Animation > Apply animation preset.
Then choose the CounterPro preset (.ffx)
4. That's all !!

NUMBERS

Start - End

Allows you to select the start and end number. No keyframe are required, the animation is done automatically. However you can add keyframes, for example if you need a more complex animation with multiple numbers stops.

Decimal numbers

Change the number of decimals

Comma or point

Choose between a comma and a point for the decimal numbers.

Negative position

Set the minus (-) before or after the symbol.

Only works if you have a negative number with a prefix symbol.

SYMBOLS

The screenshot shows a settings menu for 'Symbols'. It is organized into three main sections: 'Prefix', 'Suffix', and 'Separators'. Each section has three options: 'Enable', 'Selection', and 'Customize'. The 'Enable' options are checked, while 'Selection' and 'Customize' are unchecked. The 'Selection' options have dropdown menus with values 'USD', 'Percent', and 'Space' respectively.

Section	Option	Value
Prefix	Enable	<input checked="" type="checkbox"/>
	Selection	USD
	Customize	<input type="checkbox"/>
Suffix	Enable	<input type="checkbox"/>
	Selection	Percent
	Customize	<input type="checkbox"/>
Separators	Enable	<input checked="" type="checkbox"/>
	Selection	Space

Enable

Activate or deactivate the prefix or suffix symbol

Selection

Choose from a selection of symbols. Currencies, maths...

Customize

Allows you to add a personalized symbol :

1. Check the box
2. Go to the expression on your text layer.
Press the "E" key twice to make the expression appear.
3. Add your own symbols between quotation marks.

```
_customPrefix= "= " ;  
_customSuffix= " M " ;
```

Separators

Choose how to separate groups of thousands.

ANIMATION

▼ Animation		
▶ ⌚ Duration		2,20
▶ ⌚ Delay		0,00

Duration

Change the duration of the counter animation

Delay

Start the animation after a delay

TIMER

▼ Timer		
Enable		<input type="checkbox"/>
▼ Start time		
▶ ⌚ Hour		10,00
▶ ⌚ Minute		0,00
▶ ⌚ Second		0,00
▶ ⌚ Millisecond		0,00
▼ Separators		
Sign 1		Colon ▾
Sign 2		Colon ▾
Sign 3		Colon ▾
▼ Configuration		
▶ Hide		
▶ Speed		1,0
Format		Frames ▾
⌚ Countdown		<input type="checkbox"/>
⌚ Loop Timer		<input type="checkbox"/>
⌚ Stop at 00:00		<input checked="" type="checkbox"/>

Enable

Switch to the timer, to create countdowns and timecodes

Start time

Set the time on which the animation will start

Separators

Select symbols to separate hours, minutes, seconds and milliseconds

Hide

Allows you to hide one or more elements (hours, minutes ...)

Speed

Change the animation speed

Format

Display frames or milliseconds

Start time

Set the time on which the animation will start

Countdown

Switch from timer to countdown

Loop timer

Only works for countdowns. When the counter reaches 0, avoid passing on a negative value by looping the animation

Stop at 00:00

Only works for countdowns.

Stop the animation when the counter reaches 0

CounterPro

easy number animation

thanks ;)
